Click filter button	Google Chrome Version 98.0.4758.82 (Official Build) (64-bit)	Load button shouldn’t show	Load button show		Medium	Medium

Improvements:

1. The load more button should not exist on the main All Galleries Page when you don’t have search results.
2. The application doesn’t have a User-Friendly flow. The user doesn’t know what to search for. Only if a user is lucky to type a term that is searchable he will get some result, otherwise, it’s just an empty page.
3. When users click the filter button with empty search terms they should have to get all created galleries.
4. Filter button should be renamed to the Search button, if we have filter button user expects to have more filter options.
